Challenges and Objectives

- Real-time sensitive information sharing
- Widely dispersed locations
- Secure connectivity from Europe to Africa

Why SkyVision?

- Customized, end-to-end solution
- Hubless, Private Full Mesh Network
- Dynamic utilization of resources

A European Agro-Industrial Group of companies, holder of several private African agro-industrial companies, needed to connect all of its African companies both between themselves and to their headquarters.

Experiencing sub-optimal service quality with their current provider, Agro-Industrial Group contacted a leading IT infrastructure service provider and well-known system integrator. As a long-term partner, SkyVision was chosen to deliver a customized, state-of-the-art connectivity solution to suit this challenging task.

“We know that we can always count on SkyVision to provide cost-effective connectivity solutions that our customers can rely on.”

IT infrastructure service provider

Secure, Private Mesh Network

SkyVision rapidly deployed a cost effective, customized, private mesh network that enabled the Agro-Industrial Group to connect to its tens of sites around Africa and securely transfer sensitive data to its headquarters in Europe. As a result, they were able to increase the management overview of their business, while at the same time, receiving immediate information on all of their operations across Africa, dramatically increasing business productivity.

SkyVision's Private Network solutions allow global

“SkyVision provided our organization with a custom designed connectivity solution that enabled us to substantially improve our business efficiency.”

CTO, Agro-Industrial Group

enterprises to seamlessly connect and collaborate with their remote branches, for maximum business efficiency. Combining satellite and fiber, advanced VSAT technology and extensive infrastructure, enterprises can enjoy significantly increased flexibility and management control across vast geographic boundaries. Features include: a wide range of data rates, an unlimited number of sites, worldwide MPLS connectivity, bi-directional TCP and web acceleration and, the lowest possible latency. Cost effective and scalable, SkyVision's Private Network solutions are reliable, efficient and flexible, and provide secure connectivity suited for a wide range of business needs.
